About Soft Pastels:

Soft pastels give you a very realistic and beautiful painting of your subject, but they are delicate and should be handled with the same care as all valuable works of art. Even though I use a fixative to hold the pastels onto the velour paper, it is very common to have a little residue come off the painting. If this happens, lightly blow the residue away, use a clean cloth and wipe away the excess from the mat and/or glass of your frame.

Enjoy your painting!
